

## Garrett Corp. Reports Net For 9 Months

The Garrett Corp. yesterday reported a net profit of \$1,050,000 after taxes from consolidated sales of \$141,402,000 or 74 cents per share during the nine months period ended March 31, 1961, it was announced by J. C. Garrett, president.

period last year because heavy starting load costs on new projects continued longer than anticipated, Garrett said. These costs, however, were written off in each quarter, he pointed out, to avoid mortgaging the future, and this should have a beneficial effect on our fourth quarter.

Net profit during last year's corresponding period was \$3,901,000 on sales of \$198,614,000 or \$3.66 per share.

This year's per share earnings are currently diluted by the sale last July of 100,000 shares, the conversion of \$10,000,000 worth of debentures last December, and a 3% stock dividend in the same month.

## March Business Activity At All-Time High -- Weigel

Business activity in Southern California reached an all-time record high during the month of March, James Weigel, manager of Security First National Bank's Torrance branch reported today.

The upturn shown by the bank's index of business activity for the months of February and March indicates that the current adjustment period in the Southland has passed its low point, Weigel said.

The March index at 218.6 (preliminary) was 1.9 per cent above the January level; 3.5 per cent over March, 1960; and 6/10 of 1 per cent above the previous high recorded in July, 1959.

Despite the increase in general business activity, the bank said, unemployment in Southern California showed no improvement. Unemployment did decline in the San Diego and San Bernardino - Riverside areas, but not quite as much as expected for this time of year.

In the Los Angeles - Long Beach Metropolitan area unemployment increased against the normal seasonal trend.

## Ryan Develops Lightweight Navigation Set

A new, lightweight, all-purpose Doppler navigation set, suitable for use in all types of aircraft, has just been announced by Ryan Electronics.

The universal lightweight navigator, known as the RYANAV IV, meets the operational requirements of aircraft ranging from drones and helicopters to supersonic jets, and including VTOL and STOL (vertical and short landing and take-off). It represents the culmination of more than 14 years of Ryan research, development, flight testing, and large scale production in the highly specialized field of continuous-wave Doppler techniques.

The completely self-contained RYANAV IV provides accurate, all-weather navigation and hovering over land or sea anywhere in the world, automatically and continuously computing and displaying ground velocity and other vital navigational data without radio aids, wind estimates, or true air speed data.

These Ryan navigation sets involve thousands of production units on order for installation as operational equipment in more than 25 types of aircraft, including land-based patrol bombers, anti-submarine warfare seaplanes, reconnaissance and attack planes, carrier-based ASW aircraft, airborne early warning aircraft, ASW helicopters, airships and certain special purpose aircraft.

THE BANK noted that department store sales in the southern half showed a strong recovery during March, displaying substantial gains over both January of this year and February 1960, seasonal factors considered. March sales, seasonally adjusted, were 3.6 per cent over the year-ago figures.

March's total building and construction amounted to \$315,908,000. Although it was the largest volume recorded since June, 1960, and represented a substantial rise from the February level, the extent of the increase coincided almost exactly with the normal seasonal expectations at this time of year.

HOMEBUILDING activity in the 14-county area increased sharply between February and March. However, the gain was less than the seasonal rise which is usual between these two months.

Permits for 12,181 dwelling units were issued during March, bringing the aggregate for the first quarter of 1961 to 31,694, or 8 per cent below the corresponding 1960 period.

## CHICAGO

Be good to yourself and your budget, too! **\$64<sup>18</sup>**  
Go Union Pacific Domeliner. Modern leg-rest seats. **COACH—ONE WAY**

**\$109<sup>65</sup> ROUND TRIP** All fares plus tax and small reserved seat charge. Fares shown from Los Angeles.

And don't forget, with Union Pacific Family Fares (Coach or Pullman) your wife can go along and travel 1-way free on the round trip! Extra savings with children, too.

Traveling Pullman, a wife accompanying her husband can travel LA to Chicago in bedroom accommodations for \$56.05 on Family Fare days!
